

compost food, or don't know what to do with it. It's also hard to know what to do with the already giant piles of food in landfills. One thing we can do to decrease food waste is talk to people about it. Getting your neighborhood or town involved with simple practices like composting or a community garden can make a difference. You can also be more mindful when buying produce at the store. The majority of foods in landfills are foods that don't look as pretty as what you would see in a store. Just because that tomato is misshapen or the lettuce has a brown spot doesn't mean they aren't edible.

Another good way to decrease food waste is donating to organizations that rescue food, like Feeding America. You can also donate directly to your local food bank, which provides meals for families in need. This is a great option, because food waste also contributes to food insecurity. Whatever you may choose to do, we can all be more mindful when thinking about our food consumption and the consequences.●
